

# Variety Description

## Variety

## SUSAN

Species	Summer feed pea
Botanical name	Pisum sativum
Ploidy	2
Seeding rate	160 kg/ha
Distance between rows	as cereals
Sowing period	March to April
Sowing depth	4–6 cm

### Agronomic figures\*:

Pinnate leaves	yes
Grain colour	olive-green
Thousand grain weight	4
Beginning of flowering	6
Development after sowing	5
Tendency to lodging	5
DM-yield total	3

### Clarification of figures\*:

1: very early, very low / 5: medium / 9: very late, very high

## Variety description

SUSAN is a fast-growing feed pea that can be used both as forage and green manure. SUSAN is characterised by high mass formation after sowing, which helps to suppress weeds. The rapid mass growth enables it to produce high yields.

## Most important characteristics

Can be used as feed and green manure plant  
High mass formation in the early development  
Quick plant stand

## Usage

Suitable inoculant with appropriate rhizobia:  
**RhizoFix® RF-30**
