

Variety Description

Variety

DON QUICHOTE

Species	Fodder radish
Botanical name	Raphanus sativus
Ploidy	2
Seeding rate	25–30 kg/ha as catch crop as cereals
Distance between rows	
Sowing period	from July to late August
Sowing depth	2–3 cm

Agronomic figures*:

Susceptibility to beet cyst nematodes	1
Development after sowing	6
Inclination to flower	4
Tendency to lodging	2

Clarification of figures*:

1: very early, very low / 5: medium / 9: very late, very high
