

Variety Description

Variety

Species	Perennial ryegrass
Botanical name	Lolium perenne
Ploidy	2
Seeding rate	30 g/m ²
Distance between rows	Broadcast seeding
Sowing period	March to September
Sowing depth	Superficial

CONFIDENCE

Agronomic figures:

Suitability for reseeding	*****
Resistance properties	****
Slow growth	*****
Leaf fineness	*****
Winter-hardiness	****
Sward density	*****

Clarification of figures (cultivator information):

* very low / ***** very high

Variety description

CONFIDENCE is an innovative, stoloniferous grass variety with a very strong ability to regenerate. Even larger gaps can be effectively closed by the enormous runners. In addition, the variety has all the turf properties of an effective sports and high-wearing lawn grass. The extraordinary green colouration and leaf fineness make CONFIDENCE an absolutely top-class Lolium variety.

Most important characteristics

Stoloniferous
Fine leaf structure
Regenerative
Dark green
Best suited for sports and high-wearing lawns

Usage

One of the first stoloniferous Lolium perenne varieties with excellent turf properties.
