

Variety Description

Variety

BROOKLAWN

Species	Smooth-stalked meadow grass
Botanical name	Poa pratensis
Ploidy	2
Seeding rate	15 g/m ²
Distance between rows	Broadcast seeding
Sowing period	March to September
Sowing depth	Superficial

Agronomic figures:

Ornamental lawns	
Recreational lawns (RL)	6*
Hard-wearing lawns	6*
Landscape lawns	4*
RL sward colour	7**
RL leaf fineness	5**
RL sward density (SD)	8**
RL SD within the variety	8**
Suitability for recreational lawns	8**
Suitability for hard-wearing lawns	7**
Suitability for landscape lawns	6**

Clarification of figures:

* 3: limited suitability / 6: suitable to well-suited / 9: extremely suitable

** 1: very early, very low / 5: medium / 9: very late, very high

Variety description

BROOKLAWN, a smooth-stalked meadow grass variety, is among the top varieties for recreational and hard-wearing lawns. BROOKLAWN exhibits high sward density with a strong rhizome-forming habit, enabling it to close gaps in lawns and effectively suppress weeds. Furthermore, BROOKLAWN shows a very high disease tolerance. This variety is suitable for all kinds of recreational and hard-wearing lawns, making it an indispensable element in such lawn mixtures.

Most important characteristics

Extremely high sward density with a strong rhizome-forming habit
Intense sward colour
Very high disease tolerance
Excellent suitability for recreational and hard-wearing lawns

Usage
