

Variety Description

Variety

PERICON

Species	White clover
Botanical name	Trifolium repens
Ploidy	2
Seeding rate	12-15 kg/ha
Distance between rows	Similar to cereals
Sowing period	March to August
Sowing depth	1-2 cm

Agronomic figures*:

Development after sowing	5
Tendency to winterkilling	5
DM yield total	5
DM yield first cut	6
DM yield in aftermath	5
Crude protein content	5
Beginning of flowering	5
Sward density	5
Leaf size	9

Clarification of figures*:

1: very early, very low / 5: medium / 9: very late, very high

* **Source:** Cultivator classification

Variety description

PERICON is a high-performance variety that is ideally suited for use in mixtures and undersowing. PERICON stands out for its uniform yield distribution with slight advantages in the first cut. The variety can close gaps quickly thanks to its strong stolon formation and its large leaves, which are rated 9, are also particularly noteworthy.

Most important characteristics

High yield
High protein content
Good sward density
Tolerates cutting and trampling

Usage

Available on request with **Coated Seed Rhizo!**

Suitable inoculant with appropriate rhizobia:
RhizoFix® RF-40
