

Variety Description

Variety

APOLO

Species	White clover
Botanical name	Trifolium repens
Ploidy	2
Seeding rate	12–15 kg/ha
Distance between rows	as cereals
Sowing period	March to August
Sowing depth	1–2 cm

Agronomic figures*:

Development after sowing	5
Tendency to winterkilling	5
DM-yield total	4
DM-yield first cut	5
DM-yield in aftermath	4
Crude protein content	5
Beginning of flowering	4
Sward density	5

Clarification of figures*:

1: very early, very low / 5: medium / 9: very late, very high

* **Source:** Cultivator classification

Variety description

The white clover variety APOLO shows medium-high growth, which results in good stability and steady yields. It is a good ingredient in seed mixtures for permanent grasslands and can be used for both new sowing and reseeded.

Most important characteristics

Good stability
Steady yields
Good ingredient in seed mixtures for permanent grasslands

Usage

Also available as **coated seed** [Mantelsaat®].

Suitable inoculant with appropriate rhizobia:
RhizoFix® RF-40
